OUR TEACHING STYLE

At Euroace, we believe the best way to learn is by adopting a practical approach and teaching in a personal way. To achieve this, our experienced teachers organize classes tailored to each individual's requirements and abilities. Our classes are as original and unique as each one of you!

From the start, our teachers gain a deep understanding of each student's strengths and weaknesses, as well as their goals and interests. While conversation and putting the language into practice serves as the basis for our student's day-to-day learning, we also access resources from various publishers, ELE, and original Euroace designed materials.

Classes are supplemented with written work to take home which we believe will strongly reinforce classroom content and learning.

We conduct the classes exclusively in Spanish, adopting a communicative approach that emphasizes interaction to strengthen conversational abilities. This helps our students to grasp the language structures and rules in a natural way, whilst facilitating faster assimilation of the language in terms of grammar rules, expressions, sentence structures, vocabulary and proper pronunciation. We present the necessary tools and activities, at the appropriate time, so that students not only excel in reaching their learning goals, but surpass them as well!

We believe learning Spanish is an individual process, therefore we do our utmost to facilitate each of our students' personal development and provide them with a comprehensive and unique learning experience.
